# Building "Bread and Butter" hulls – My Way

By: John Cheevers

04/05/2016

11/12/2022

Add some Sweat

And remove everything that is not the hull

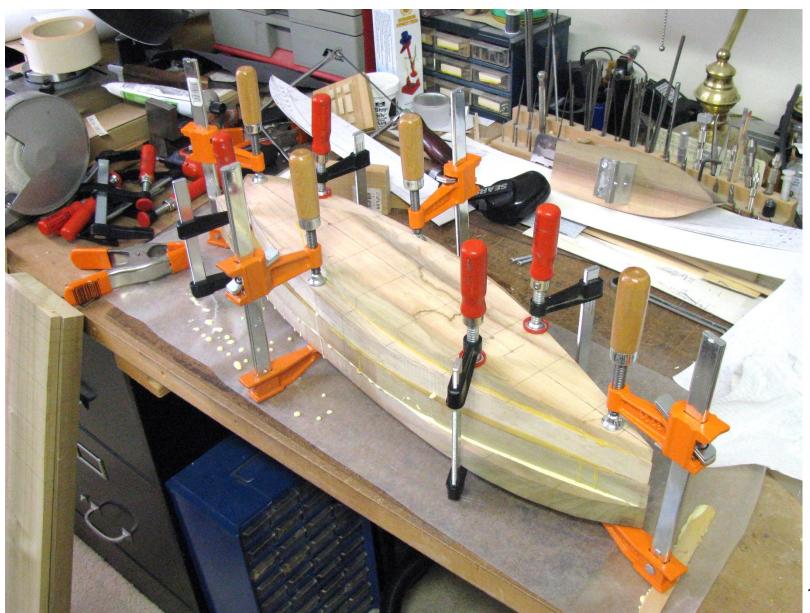

### Once more with flair?

### OK, let's go a little slower: you take some Bread...

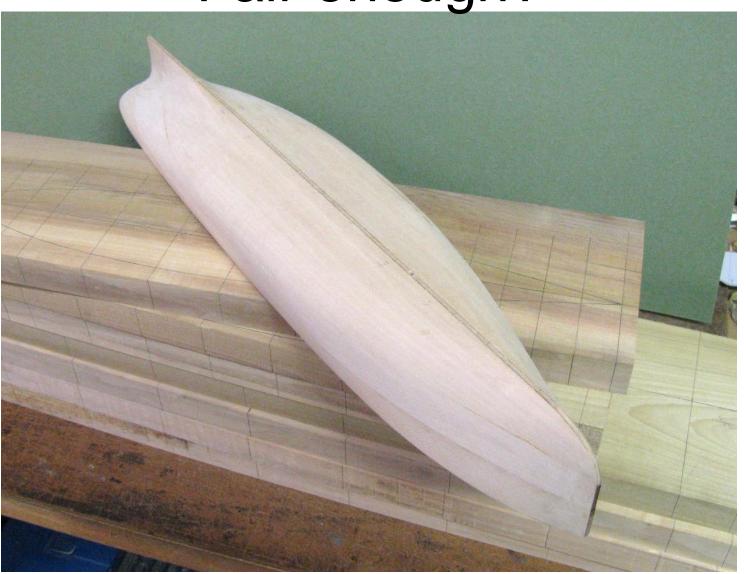

#### Jam the slices together...

#### Gnaw on it a bit...

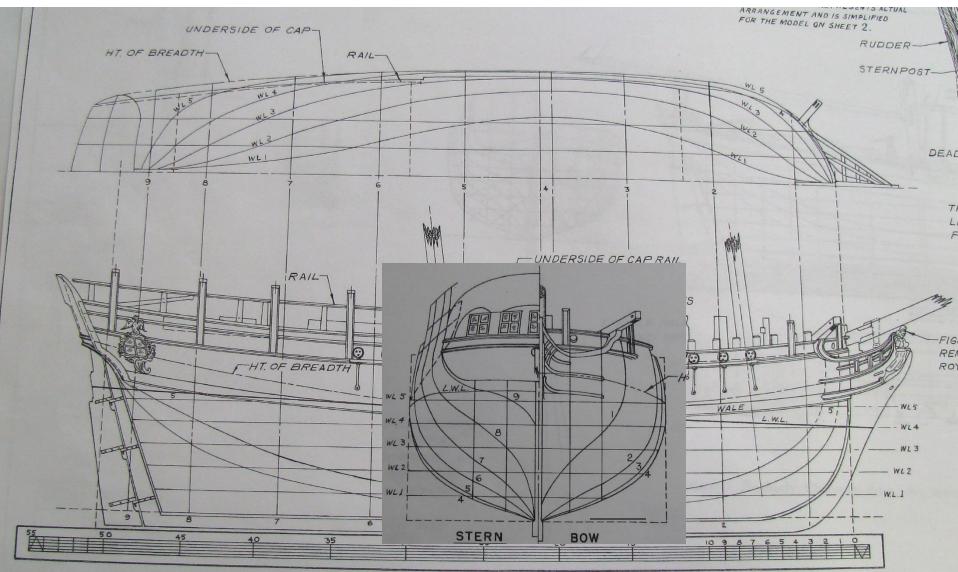

## And out pops a hull... Fair enough?

## Now with gusto...

#### A typical lines plan

~LINES AS TAKEN OFF AT THE DEPTFORD YARD-JUNE 1768~

(LINES SHOWN TO INSIDE OF PLANK)

With a couple of layout tools

#### And a few hand tools...

#### And a few hand tools...

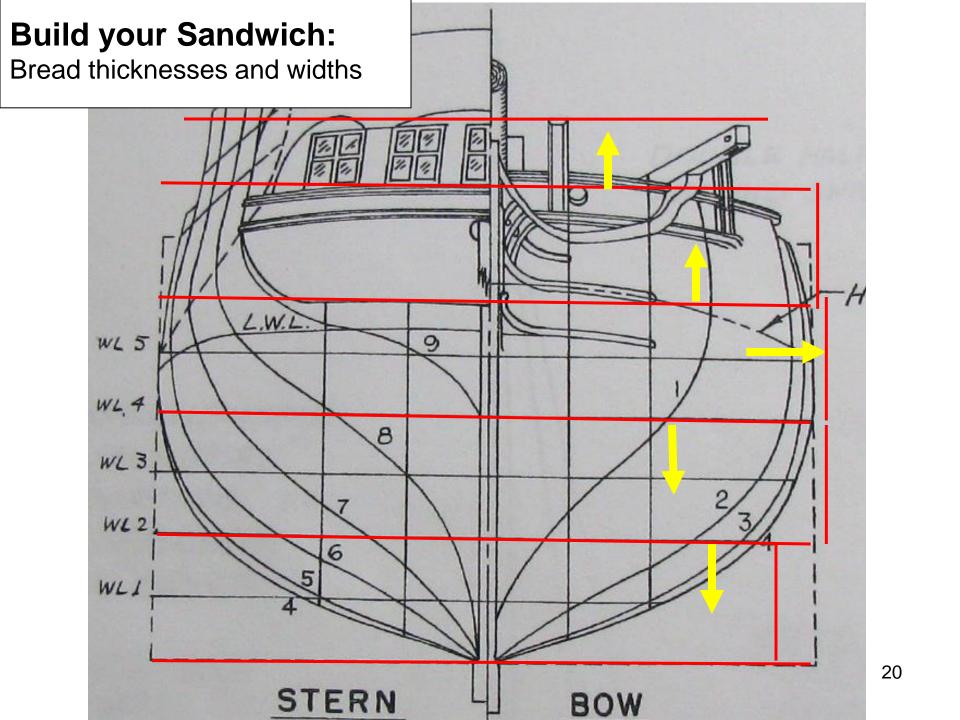

#### And a few hand tools...

Work position holder

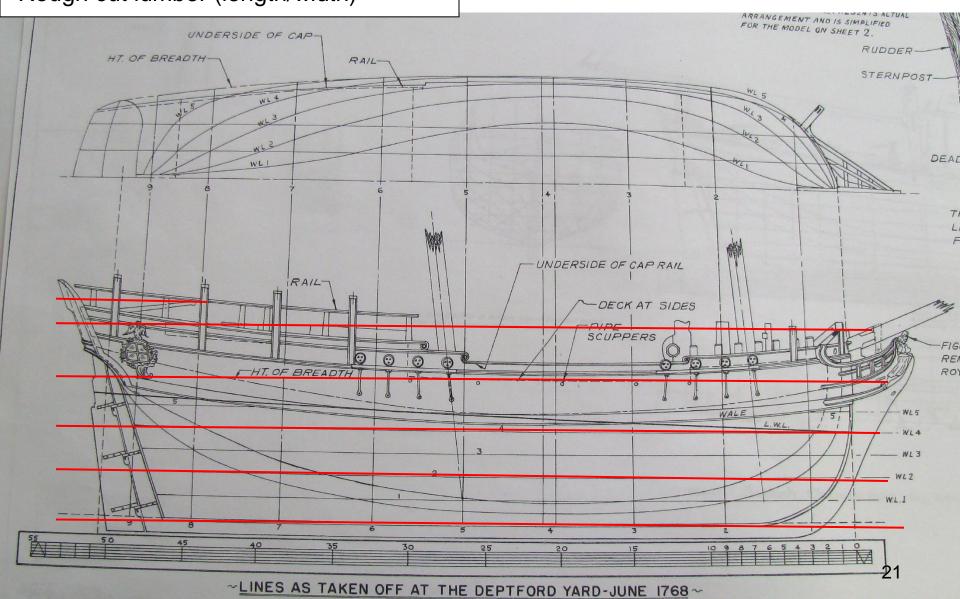

#### **Build your Sandwich:**

- Define your lifts (thickness)
- Rough cut lumber (length/width)

(LINES SHOWN TO INSIDE OF PLANK)

#### **Templates!**

#### Templates!!

#### Templates!!!

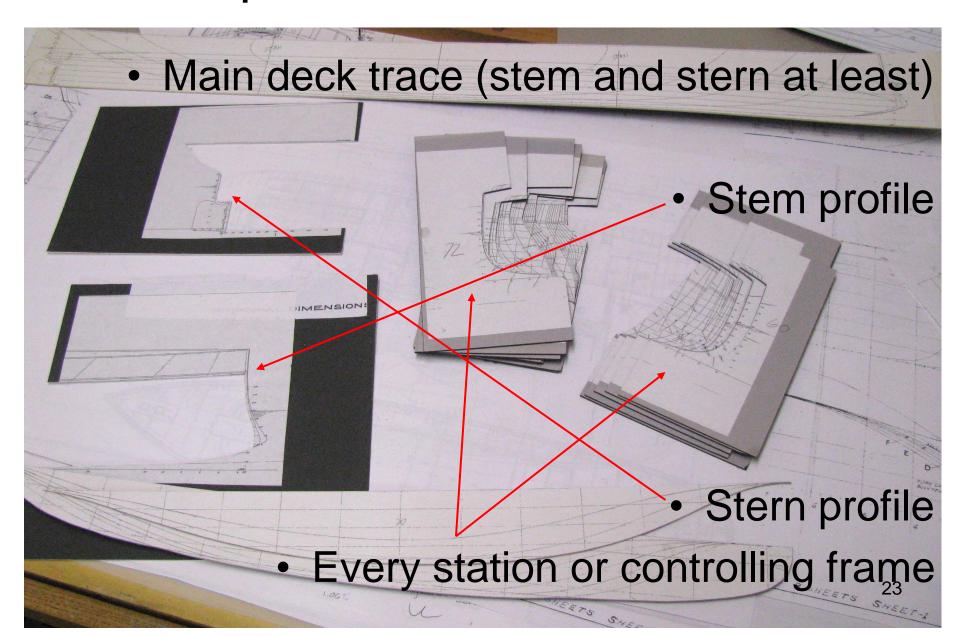

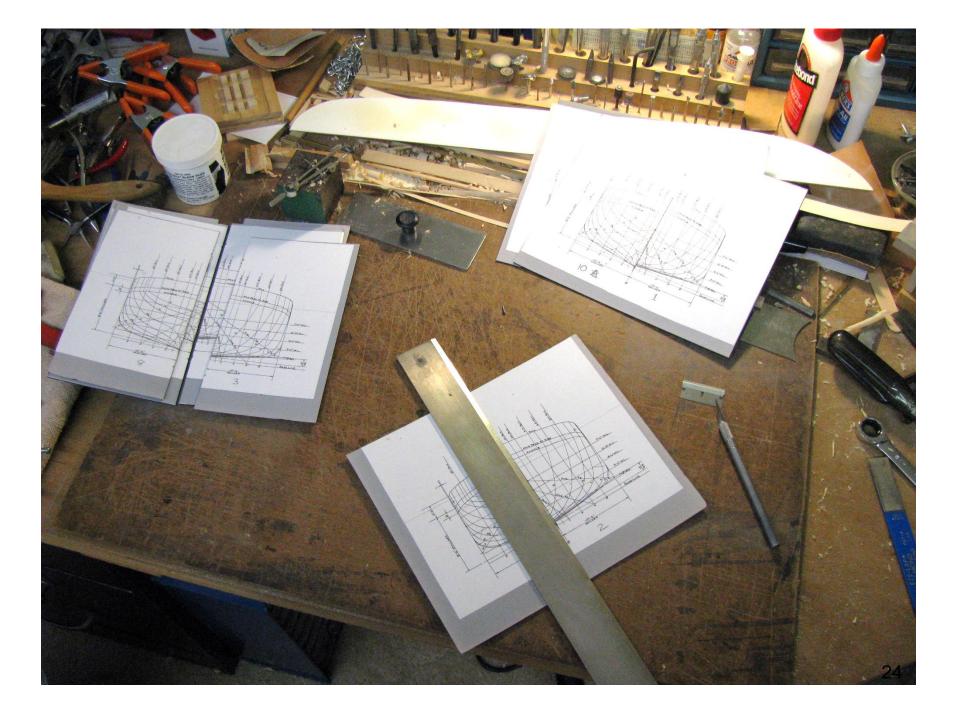

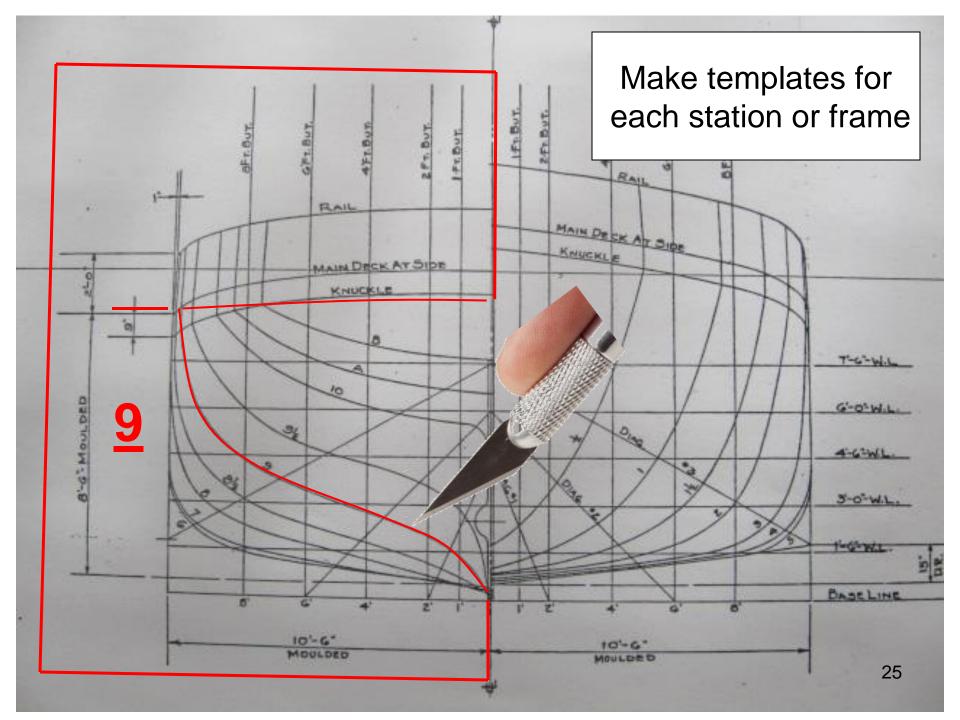

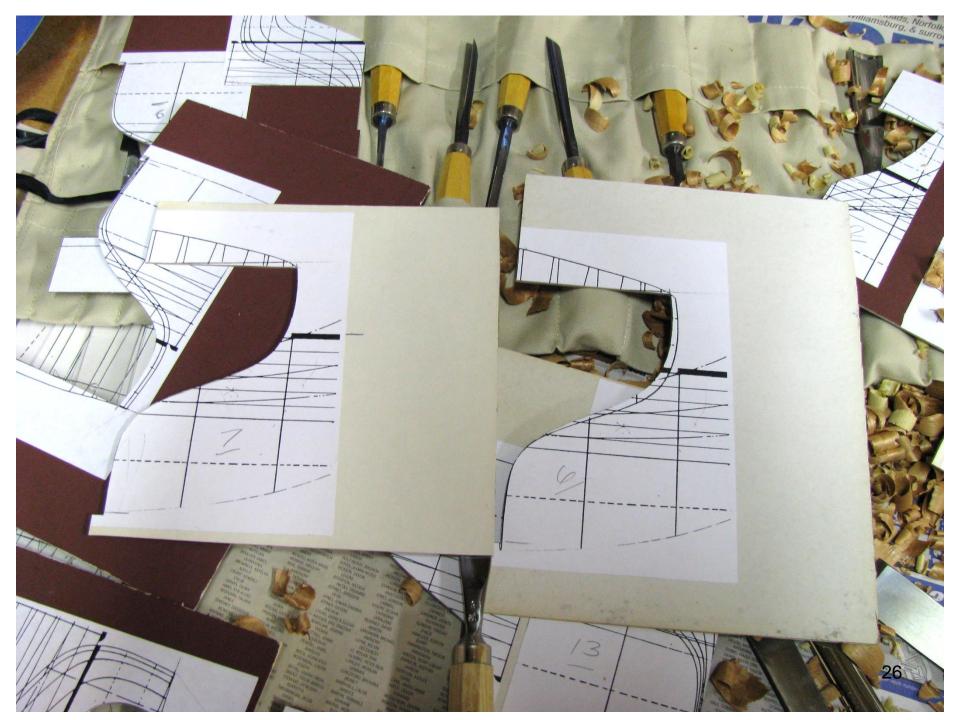

#### Templates define boundaries

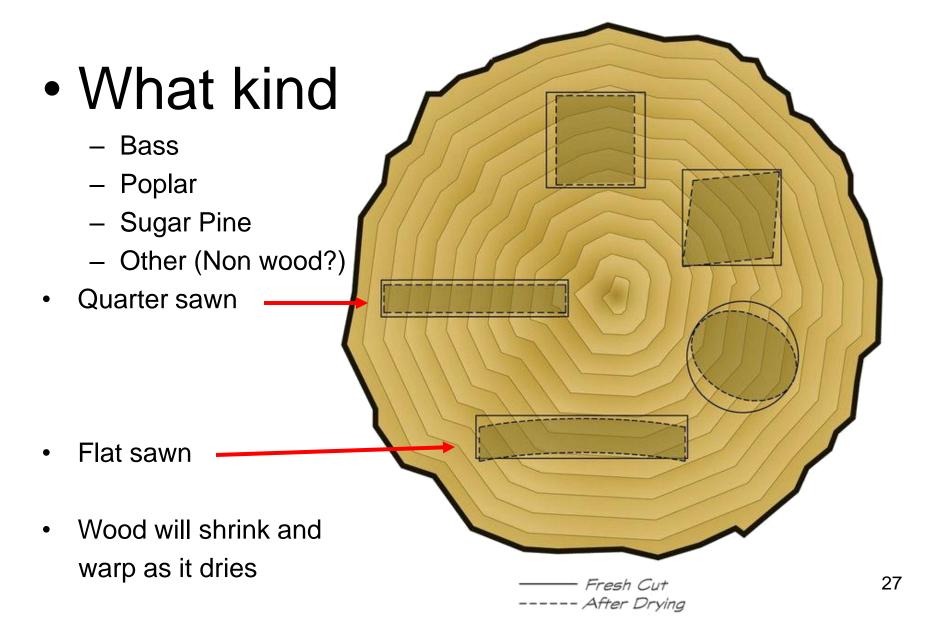

#### A bit about wood

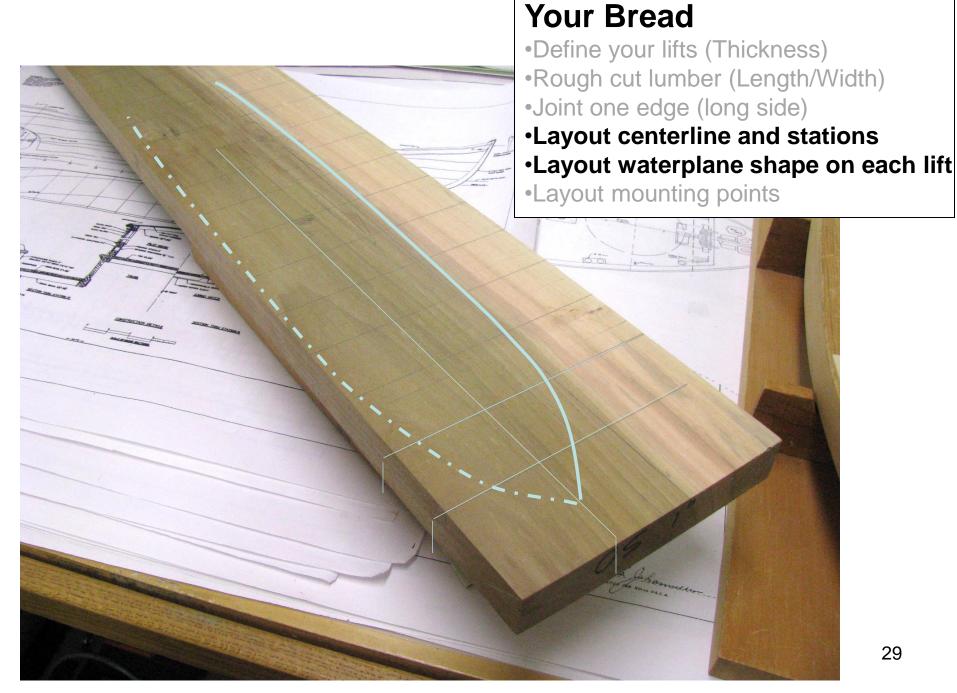

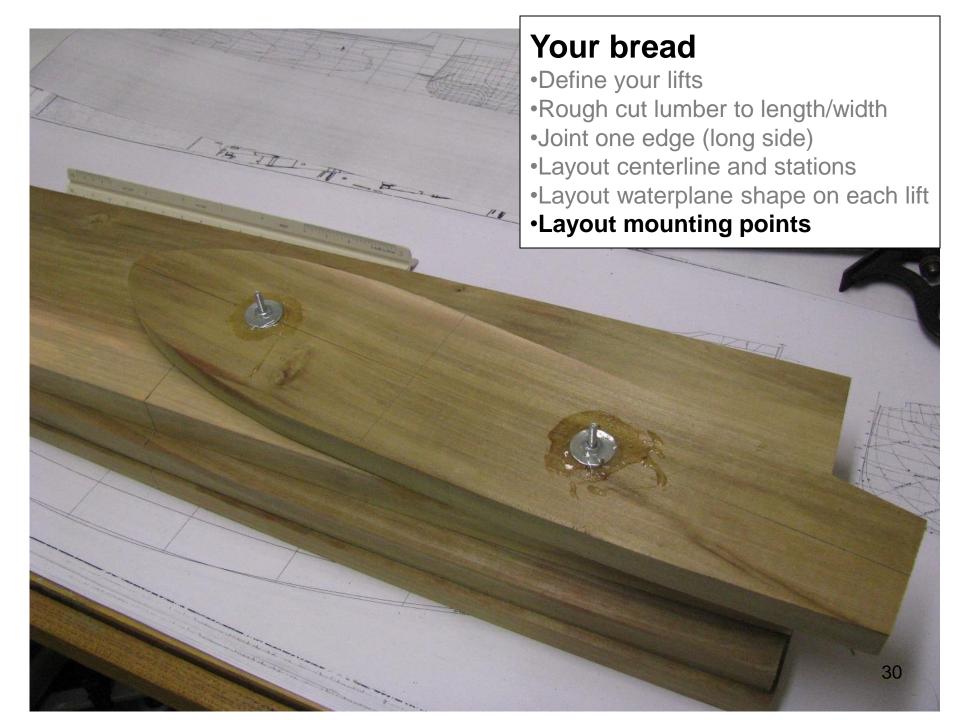

#### Slices - or Lifts

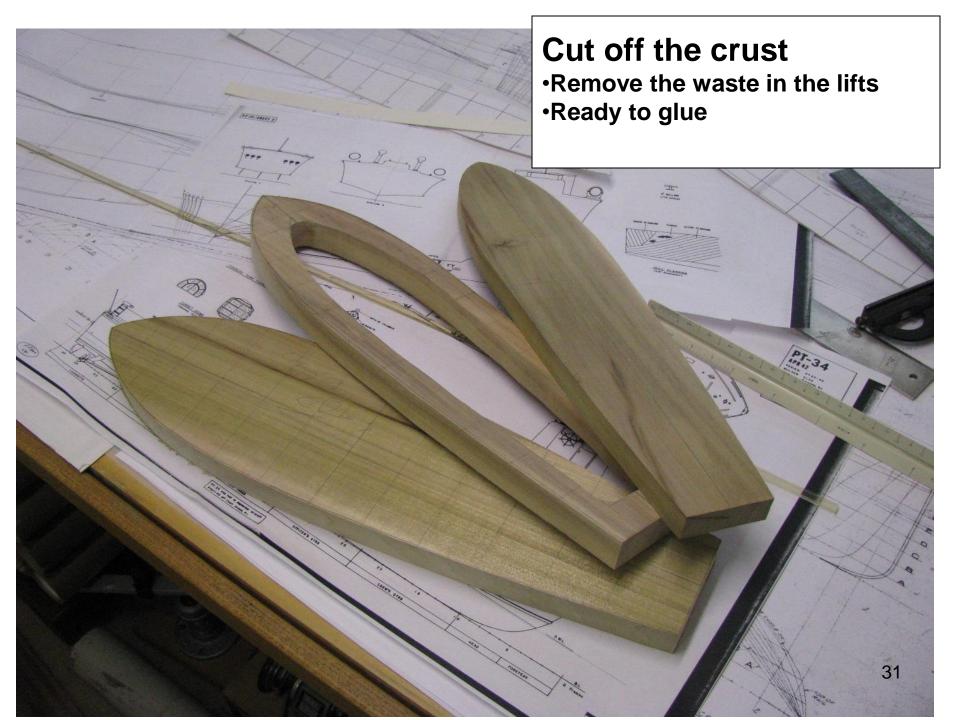

#### **Build your Sandwich:**

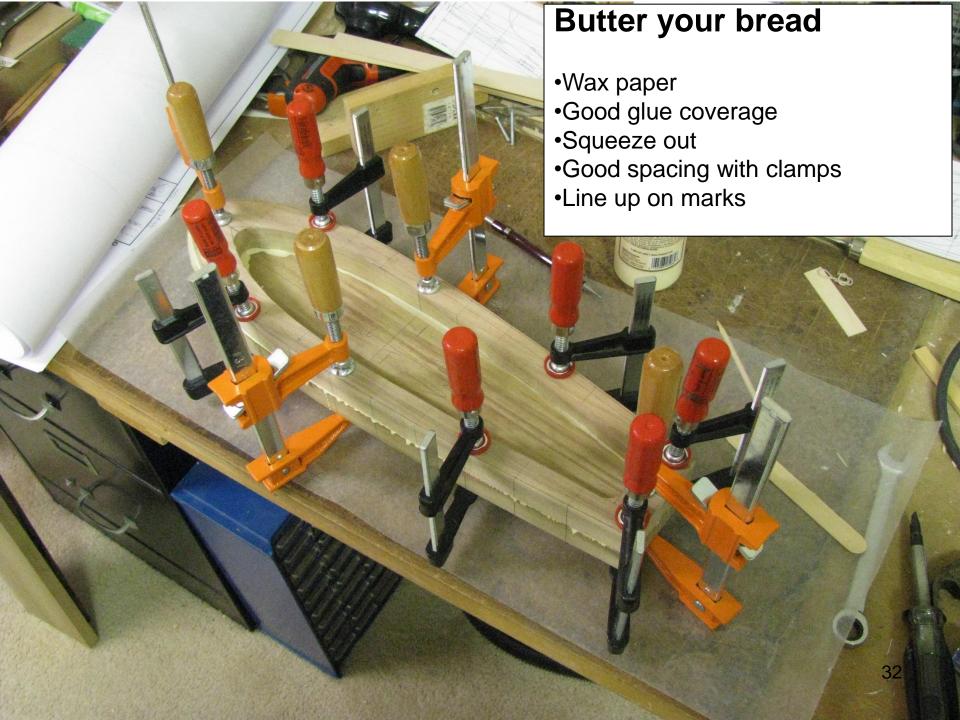

Rough cut lumber (length/width)

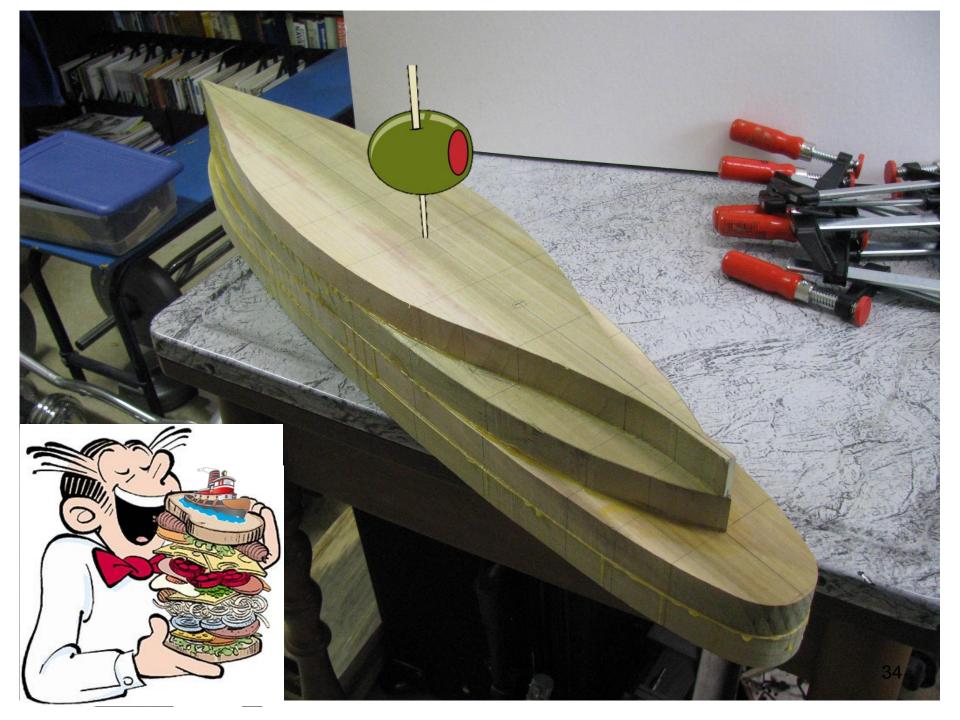

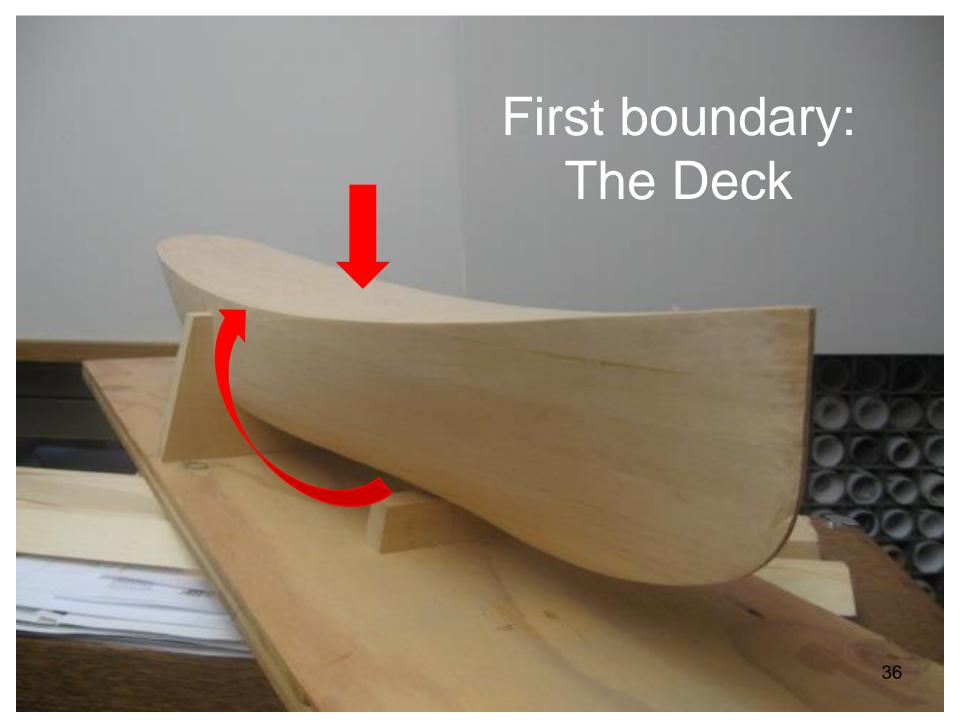

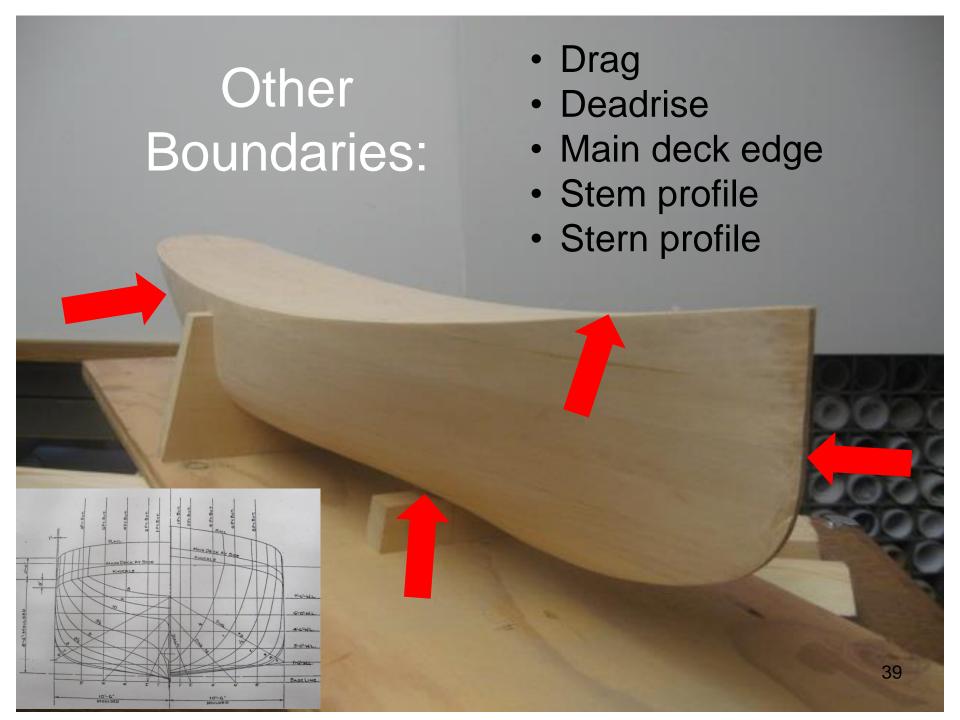

# Let's gnaw on that sandwich!

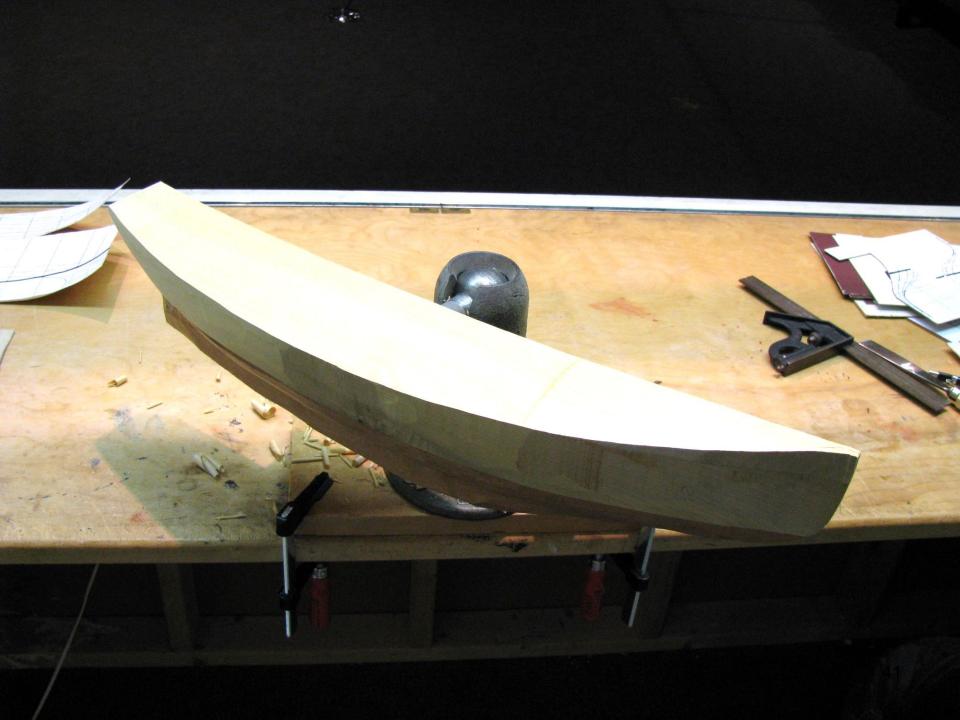

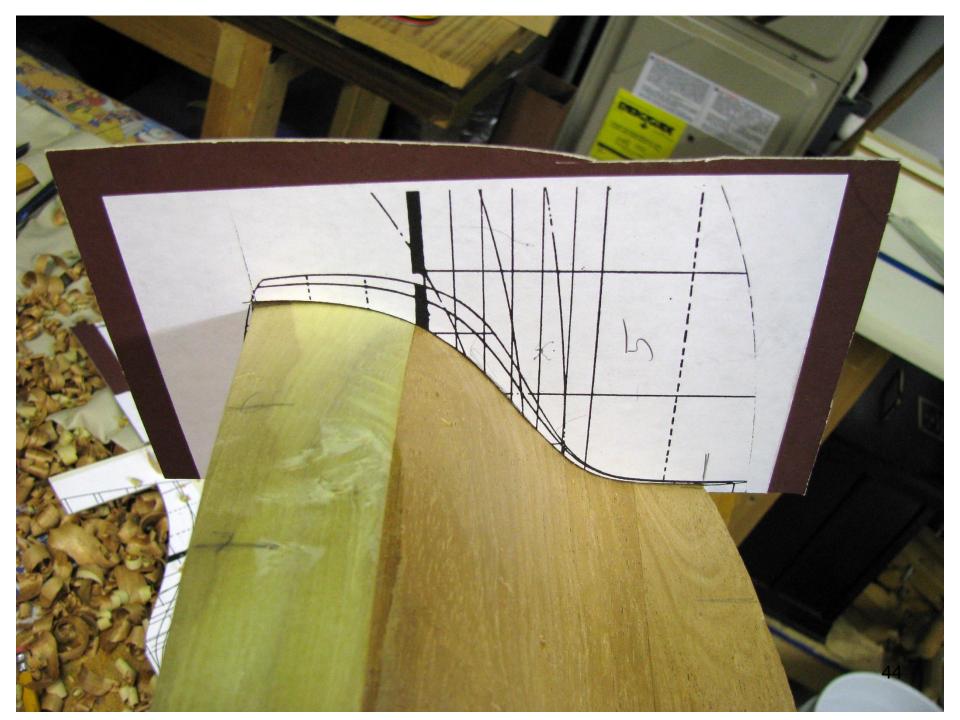

## Time to carve!

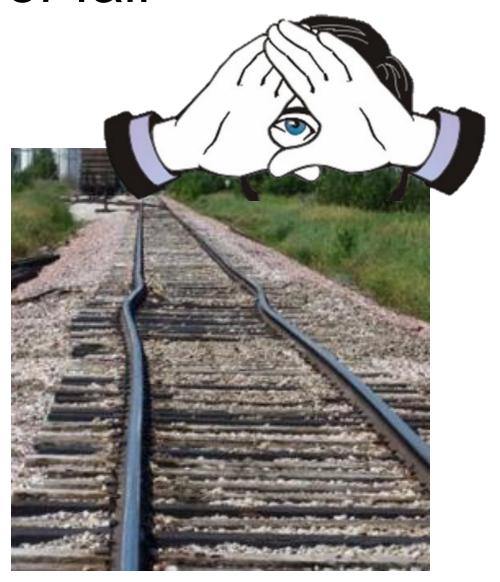

## Check for fair

## Check for fair
